Sandra Walters, Principal
SWC
6410 Fifth Street, Suite 5
Key West, FL 33040

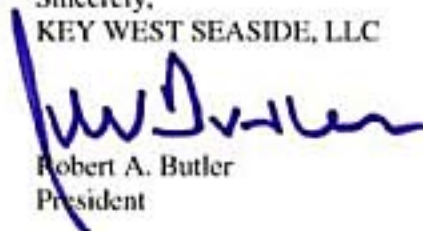

Dear Sandy:

I am writing this letter to thank you for the excellent work you have done for my projects in Key West over the last several years, in relation to permitting issues with the South Florida Water Management District and U.S. Army Corps of Engineers. SWC examined extensive records and correspondence to determine the accurate status and sequence of events, and collected field data to document current conditions. Then, SWC's excellent relationships with the regulatory agencies resulted in meetings with the right people that led to effective resolution of issues.

A September 26, 2007 front-page article in the Key West Citizen described accolades given to my company by the Water Management District for a culvert we installed improving circulation to the western Salt Ponds. This project was developed by you and your staff in cooperation with the District, and SWC prepared and processed all required paperwork to acquire agency approval with remarkable speed and efficiency. According to District staff, this is the first time the agency has ever given such an award for an environmental project, and my company would not have received this without SWC's highly-professional consulting services.

I would strongly recommend your company to anyone requiring environmental and planning services, and look forward to continuing to work with SWC.

Sincerely,
KEY WEST SEASIDE, LLC

Robert A. Butler
President
