

ROB STEWART

Senior Project Manager

Academic Background

Master of Arts, Marine Affairs (Marine Resource Management / Underwater Archaeology), Rosenstiel School of Marine & Atmospheric Science, University of Miami, 2000

Bachelor of Arts (Anthropology and Archaeology), University of South Florida, 1997

Specialized Professional Competence

Mr. Stewart has over 19 years of field and project management experience in the areas of Environmental Construction Compliance, habitat and water quality monitoring, ecological assessments, cultural resource identification and preservation, marine resource management, endangered species monitoring and construction management.

Representative Professional Experience

**Senior Project Manager, SWC, October 2011-present
Monroe and Miami-Dade County offices, FL**

Serve as consulting team member with responsibilities including environmental permit compliance, construction management, jobsite inspections including erosion control and turbidity sampling, establishment of a project permit library, oversight of diving operations if required, participation in meetings to track environmental issues and supervision of SWC permit compliance staff.

- **Herbert Hoover Dike Culverts 5 and 5A Restoration, USACE, Glades County, FL**
Drafted Environmental Protection Plan (EPP), Stormwater Pollution Prevention Plan (SWPPP), performed Eastern Indigo Snake and erosion control inspections.

Recent Relevant Project Experience

- **Port of Miami Tunnel Project (POMT), FDOT District Six, Miami-Dade County**
Environmental compliance for construction of the Port of Miami Tunnel, modifications to the Mac Arthur Causeway Bridge and relocation of approximately 3 miles of roadway. Responsible for overseeing contractor's compliance with environmental permits, performing water quality and "frac out" monitoring, contaminated soil tracking, oversight of environmental aspects of bridge construction and tunnel construction. Coordination with Florida Department of Transportation and permitting agency personnel is also a regular function of this position.
- **State Road 79 Widening and Reconstruction, FDOT District Three, Holmes and Washington counties**
Provided supervision for on-site environmental compliance technician. Project consists of widening from a two lane to a four lane roadway, along with bridge replacement and stormwater treatment pond construction.

- **Reconstruction of US 1/Jewfish Creek Bridge, FDOT District Six, Miami-Dade and Monroe counties**
Environmental compliance for reconstruction of Jewfish Creek Bridge and 18-mile of roadway between Florida City and Key Largo. Responsible for overseeing contractor's compliance with environmental permits, monitoring Soil Mixing operations, performing regular water quality testing, seagrass and benthic habitat surveys, maintaining and updating an environmental commitment tracker for the project, and ongoing coordination with FDOT and permitting agency personnel.
- **Brickell on the River Development, Miami-Dade County, FL**
Cultural Resource Assessment Survey and Permit Compliance Monitoring. Responsible for supervising fieldwork and overseeing contractor's compliance with Certificate of Appropriateness to Dig Permit.
- **Cultural Resource Assessment Survey of Section 9 Township 52S, Range 40E, Miami-Dade County, FL**
Responsible for environmental analysis and determination of site potential.
- **Cultural Resource Assessment Survey, South Miami Drive, Miami-Dade County, FL**
Responsible for conducting archaeological survey of three adjacent parcels and monitoring during construction activities to ensure permit compliance.
