

TETRA TECH

August 14, 2012

To Whom It May Concern;

I am pleased to provide this letter of commendation and recommendation for Sandra Walters Consultants, Inc. (SWC).

From September 21, 2010, through August 12, 2012, I was the Tetra Tech project manager for environmental review support services to the U.S Coast Guard (USCG). We provided environmental expertise in reviewing and approving applications for USCG permits for bridges nationwide. During that time, we had a subcontract with SWC to staff our support onsite at the USCG District 7 office in Miami, Florida. District staff has provided numerous expressions of pleasure with the SWC technical performance, praise that I echo. I also found Mrs. Walters and her office staff to be prompt and gracious in meeting my project management needs. Tetra Tech and I would welcome the opportunity to work with SWC again.

Jon Cudworth, Project Manager
